

# Roasted Beef Flakes

*Roasted Beef Flakes is a high energy ration designed specifically for maximizing growth in fattening cattle. All the cereal grains used in manufacturing roasted beef flakes are micronised and flaked in order to ensure maximum rumen starch digestibility. This together with the use of the rumen modifier Bovatec improves growth rates and feed conversion efficiencies. Bovatec also aids in reducing the risk of rumen acidosis. High levels of molasses not only improves palatability but also reduces dusty fines in the ration.*

Metabolisable Energy	12.0mj/kg
Min. Protein	12.5%
Min. Crude Fat	3.0%
Max. Crude Fibre	8.0%
Calcium	1.5%
Phosphorus	0.23%
Salt	0.5%
Copper	15.0mg/kg
Selenium	0.1mg/kg

## Feeding Rate

*Day 1-5 Feed good quality hay (eg. Shredded Lucerne)*

*Day 6-14 Start cattle a smaller amount, gradually increasing to a maximum of 2.5% of the animals body weight. Then feed to appetite, ensuring cattle have access to fresh clean water at all times.*

## Ingredients

*Micronised Sorghum and Barley, Molasses, Limestone, Sodium Bentonite, Whole Cotton Seed, Salt, Urea, and Feedlot plus Bovatec Premix.*
